

## **Matthew R. Barry**

Matt Barry is the Technical Integration Lead for software in NASA's new Constellation Program Office, responsible for requirements, standards, policies, processes, and integration of all software across the exploration program elements. Matt was a Space Shuttle mission controller and a new business project manager for Rockwell Space Operations, and was Rockwell International's 1994 Engineer of the Year. Matt was an Executive Branch Science and Engineering Fellow at the White House Office of Science and Technology Policy, Director of Advanced Technology at United Space Alliance, Deputy Manager of the Mission Information Technology Program at the Jet Propulsion Lab, and Program Director for Destination Surface Systems at NASA Headquarters. Matt currently is a JPL employee stationed at the Johnson Space Center. Matt earned BSME, MS, MBA, and PhD degrees from Rice University in Houston, where in 1997 he was awarded Rice University's Outstanding Young Engineering Alumnus Award.
