The Issue
Weather-Related Service Management (WRSM)

Good weather does not significantly affect Earth/space radio communications

Bad weather can significantly affect Earth/space radio communications
A Look at the Statistics
Weather-Related Service Management (WRSM)

On the average, up to 10% of CONUS experiences rain with a probability of 0.25%
Objective
Weather-Related Service Management (WRSM)

Manage spacecraft and ground station resources to minimize the impact of weather on Earth/space links
