

Homework

UML & Rational Rose, Part B

IV&V Students Only

50-60 points

E-mail your reports along the diagram you received to the DEN by 2 PM on Monday, 14 October 2002. Send a copy of your report to the student who created the diagram.

Each member of your project development team will be sending you a Rose Model containing of the diagrams described in the first part of this exercise by 7 October. For each Rose diagram that you receive write a brief report that includes the following.

- a. What you think the diagram is telling you. For example, who are stakeholders and what are system services shown in the diagram OCD section 2.3 System Boundary and Environment.
- b. Where you think the diagram creator
 - i. Made a project errors (e.g., missed a stakeholder)
 - ii. Made errors in either representation or could have used UML more effectively,
 - iii. Violated an MBASE Guideline.
- c. Where you think the diagram creator did a particular good job.

For a single diagram, it may be difficult to identify items for (b) or (c). Do your best.

Each report is worth 10 points.

If a project team member sends you a diagram before 7 October, please make your best effort to send back a report in time for them to incorporate your comments by their deadline (2PM, 7 October) for turning in their assignment to the TA. You will receive a 20% bonus for each report that you are able to return in time.
