

CSCI 577a, Fall 2002

IV&V Prototype Evaluation Report

Schedule

IV&V		Based on Team Assignments	
Due Date	Assignment	Team Artifact	Deadline
10/04	Evaluation of Prototype (20 pts)	Prototype (20)	09/30

Check the 577a Schedule Web page for any changes to the deadlines.

In general, we've tried to give you a week from the team artifact deadline to produce a report on your evaluation. If you do not have access to the team artifact(s) by their deadline, you must discuss with the team when you will have access. Please copy Ed Colbert (ecolbert@usc.edu) and Mohammed Alsaïd (alsaid@usc.edu) on any related E-mail. If you cannot get the artifact in time, send E-mail explaining the situation to Ed Colbert (ecolbert@usc.edu), and Mohammed Alsaïd (alsaid@usc.edu). We'll evaluate your situation and see what can be done.

Task

Review the Prototype Team Assignment (follow link from 577a Schedule) and the team's Prototyping Results Document. Produce a report in which you evaluate the team prototype effort and results. In addition to the general issues described in the *IV&V Assignments & General Guidelines*, you should consider the following.

1. Did they appear follow the prototyping guidelines discussed in class?
2. Did they clearly describe the critical issues and risks, what they did, the results, and conclusions.
3. Is the list of prioritized items that they will be looking into next reasonable (i.e. complete and well ordered given the risks involved)? Describe anything missing that you think needs to be investigated or that you think doesn't need to be prototyped.

E-mail your reports to the DEN and check your report into ClearCase by 2 PM on 4 October 2002. Discuss your report with your project team.
