

CSE Budget Management System

Clients:

Barry Boehm, boehm@sunset.usc.edu

LaDonna Pierce, ladonna@sunset.usc.edu

USC-CSE needs a better way to track and manage its budgets. This involves creating a system which automates as much as possible the entry of budget summaries from USC accounting system's monthly reports, and reorganizes their data into summaries better matched to tracking and managing budgets. The system should be web-based, but with access control capabilities to limit budget information access to authorized personnel. Some example status reporting formats are available to scope the application.
