

## CSE Electronic Cost Proposal Budget System

Clients:

LaDonna Pierce, ladonna@sunset.usc.edu

Sudha Kumar, sudha@pollux.usc.edu

USC-CS-CSE needs a better way to create and manage its cost proposal budgets. This involves creating a system that automates as much as possible the entry of cost proposal breakdown information obtained from Engineering Finance office, Special Project Accounting, Contracts & Grants and various policies from the OMB guideline. The system can be web-based with the capability to generate excel spreadsheets, track current and pending status. An example would be something similar to NSF FASTLANE.
