

CS577a Quiz 8/30/02

Name _____

Student Id _____

Answers should be short and to the point...and in the space provided.

1. What is the purpose of the anchor points (LCO: Life Cycle Objectives; LCA: Life Cycle Architecture; and IOC Initial Operating Capability)?
 - a. checking validity of software design
 - b. scheduling project activities
 - c. guaranteeing on-time payments for work done
 - d. gaining stakeholder commitments to proceed

2. What do we use in CS577a to try to avoid/resolve model clashes?
 - a. anchor points
 - b. MBASE guidelines
 - c. Brooks' Law
 - d. Rational Unified Process?

3. Did the Library Book Overdue Notice homework change your mind about anything? If so, what? If not, what did you think about the homework? (Please feel free to say "no," and even explain why. You'll get full credit for this question even if you disagree with the professors.)
