

# Setting up your team website

Contact: Jesal Bhuta, [Jesal@cse.usc.edu](mailto:Jesal@cse.usc.edu)

The webmasters of the teams have been granted permissions and quota's in the directory /auto/scf-team/csci577/teamXXa (where XXa is your team number e.g. team13a for team 13) on aludra.usc.edu or nunki.usc.edu (Use your usc email Id to login into this server). Set up your team website based on the team archiving structure. Your website is accessible from the url: <http://www-scf.usc.edu/~csci577/www/teamXXa/> (where XX is your team number e.g. <http://www-scf.usc.edu/~csci577/www/team1a/> for team 1). At this point there is a file index.html in the directory, which is world modifiable, so you can replace it.

Please make sure you set the file access permissions to world readable and executable, else it will not appear on the website. You can do this by executing the command `chmod 755 <filename>`.

Note: Only the webmasters can write in the directories at this point.

The team archiving structure is located at [http://sunset.usc.edu/cse/pub/research/577project\\_archive/using/structureA.html](http://sunset.usc.edu/cse/pub/research/577project_archive/using/structureA.html)
