

# CS 612 - Software Architectures

## Homework Assignment 3

### Assignment 3A

In this part of Assignment 3, you are required to provide an architectural breakdown for the CUSTOMER 1ST BANK system. The architecture must adhere to the C2 architectural style, discussed in class on February 9. To arrive at the architecture, use the approach discussed in the lecture and described in more detail in Section 6 of the Taylor et al. *IEEE Transactions on Software Engineering* paper.
